

## Attaching a document in 2Email

For this demonstration, we are going to use an email that Dragon has sent to Baby Bear. Dragon has got a little carried away, but that is useful as he shows us some of the many attachments you can send in 2Email.

Dragon has written a story using Microsoft Word and saved it to his computer. When he clicked 'Attach Work', it allowed him to select 'From my PC'. He could then select his cheese story from his 'Documents'.

In his excitement, he also made a game using 2Code. The game is obviously cheese themed. He has attached it by using the 'Attach Work' button and selecting it from 'My Work' on Purple Mash.
