

Logging in to Purple Mash 2Email

1

Home

Log onto Purple Mash in the usual way then select the Tools button from the homepage.

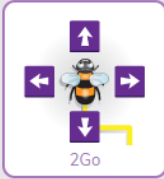

On the Tools page, scroll down until you see the 2Email icon. It is just on the right of the coding icons. Select the 2Email icon.

This is your 2Email main page. It allows you to send emails and see what emails you have received.

To start with, we have set 2Email so that you can only send and receive emails from your teachers, class TAs and all the practice users on 2Email.

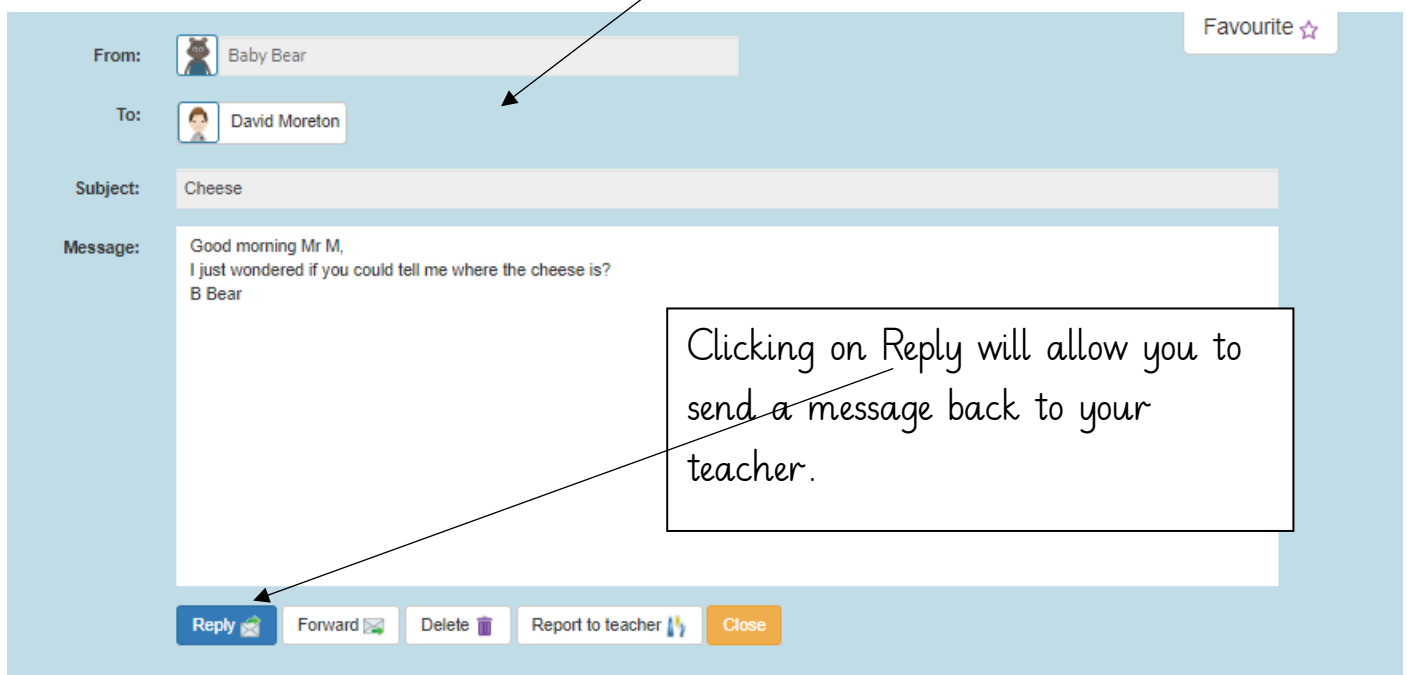

Please note: the 2Email system will not allow you to send emails outside of Purple Mash users. You can't email Nanny or the pizza delivery people!

2Email

In your Inbox you will have received an email from your teacher (in this demo, I have one from Baby Bear!)

When you double click on the name, it will open the email. It will look like the email below.

Clicking on Reply will allow you to send a message back to your teacher.

When you have written your email, click Send. It would be great if you could attach some work, or a picture (or both) by using these buttons at the bottom of your email. Another page will explain how to do this.

If you look in your address book, you will see some adults from school and a list of practice users. You can practise sending and opening emails to yourself by using the 'switch user' button.
