

Maths

In addition to practising your times tables, try the following:

Daily 6

Challenge 1

1. Round 97 to the nearest 10.
2. Write 50 in Roman numerals.
3. $9 \times 5 =$
4. $134 + 125 =$
5. What is 10 less than 405?
6. $35 \div 5 =$

Challenge 2

1. Round 8379 to the nearest 100.
2. Write 174 in Roman numerals.
3. $4 \times 6 = 12 \times \dots$
4. $567 + 389 =$
5. What is 100 less than 4006?
6. $72 \div 8 =$

Understanding place value is at the core of many areas of maths. Follow this link for a lesson on partitioning:

Science

Reminding ourselves of prior learning (things we have already learnt about) is the best way to make sure that learning sticks!

We started the year in science with 'States of Matter': solids, liquids and gases. We looked at how the states can change, for example, from a liquid to a gas, and learnt the names of these processes. We also looked at how the particles acted in each of the states.

Remind yourselves of this topic by doing one or more of the lessons here:

Reverso

1. Before you start watching, look at the name of the film and the picture above. What do you think it will be about?
 2. Watch the video, up to 1:25. What have you noticed so far?
 3. Watch again, up to 2:45. What questions do you have?
 4. Watch up 4:15. Did you know the man was going to get him into trouble? How?
 5. What type of job can Barney do now? What skills does he have? What would be an ideal job for him?
- Write a short letter from Barney, applying for one of the jobs you've thought of. Include why he would be good at it and the skills he has.
6. Watch the rest of the film up to the start of the credits. What do you think will happen now? Why do you think his dad was smiling? Write your predictions down.
 7. Watch the credits. Were your predictions correct?
- Every time I watch this film, I notice something I didn't spot before! Watch it again and look carefully. What do you notice this time?**

Keeping Active!

Try a Joe Wicks or Just Dance workout! Go at your own comfortable pace, make sure you stretch and cool down properly, and stay hydrated!

Keeping Busy!

To keep your mind active as well as your body, watch the latest episode of Newsround, go on a 'Living Things' hunt either in your garden or looking through a window, or try and draw something that is in your home. Food or food packets are a good way to practise getting details and proportions right!
